

VIBHAV INNA KEDEGE

MSc Embedded Systems (Honours), BSc Electrical Engineering

in [ikvibhav \(LINK\)](#) [Personal Website](#) [ikvibhav \(LINK\)](#)
@ ikvibhav@gmail.com
📍 Rotterdam, The Netherlands

- Date of Birth: 27th July 1995
- Nationality: Indian & Dutch Permanent Resident

PROFESSIONAL EXPERIENCE

Alfen N.V.

DevOps Software Engineer | R&D Department

📅 Oct 2023--Ongoing 📍 Almere, The Netherlands

- Design features on a software system for hardware in the loop (HIL) testing of Electric Vehicle Charging Station Firmware using **Python**, Jenkins, Docker and Azure.
- Implement features on software systems that enable data-driven decision making using **Python**-FASTAPI, SQL and Grafana
- The Impact - Implement software systems that runs 2000+ HIL tests every night and has reduced the time of software delivery from 12 weeks to 2 weeks.

KPN (via Capgemini)

Big Data Analyst | In-Home Device analytics team

📅 Oct 2021--Sep 2023 📍 The Hague, The Netherlands

- Implemented features to monitor and analyse internet quality of KPN internet devices across the Netherlands using Spark, Scala, **Python** and Tableau.
- Implemented an MLOps system to predict customer satisfaction using health metrics from KPN routers.
- The Impact - Analysed data from 1 Billion internet devices that ensured stable WiFi quality and reduced churn rate at KPN.

Almende B.V.

Robotics Researcher | R&D Department

📅 Jun 2020--Aug 2021 📍 Rotterdam, The Netherlands

- Designed distributed planning algorithms of multi-robot teams performing SLAM using **Python**, C++ and ROS. (Project Link)
- The Impact - Gained valuable insights into multi-robot planning and published our findings for a specific case. (Link)

Alstom Transport

System Engineer - Networks | Train Control Department

📅 Jul 2017--Jul 2019 📍 Bangalore, India and Sydney, Australia

- Implemented Ethernet Network based Train Control & Monitoring Systems (TCMS) on Autonomous Trains under a Model Based Design (MBD) framework.
- Performed functional testing and validated train control software on Indian and Australian operational metro train lines.
- The Impact - Demonstrated a 90% pass percentage of Network Functionality, 3 months ahead of schedule.

PERSONAL STATEMENT

'A proactive professional with 5+ years of experience in Python Software Design, Linux Systems, AI and Robotics, who enjoys solving complex problems in Agile teams'

EDUCATION

Delft University of Technology

MSc Embedded Systems (Honours)

📅 2019 - 2021 📍 Delft, Netherlands

- Specialisation - Robotics and Artificial Intelligence (AI).
- Thesis - "Multi Robot Exploration and Planning in limited communication environments" (Link).
- Published at ICAART 2022 (Link).

National Institute of Technology
Karnataka (NITK-Surathkal)

Bachelor of Technology, Electrical and
Electronics Engineering

📅 2013 - 2017 📍 Mangalore, India

- Specialisation - Embedded Software
- Thesis - "Multiple Interface Automation using Distributed Embedded Devices" (Link)

TECHNICAL SKILLS

Python
Software System Design
Linux/Bash
C++
Tensorflow
Git
ROS

CERTIFICATIONS

- Software Design and Architecture Specialization (Ongoing)
- Google Advanced Data Analytics Specialization (LINK)
- DeepLearning.AI TensorFlow Developer Specialization (LINK)
- Professional Scrum Master I (LINK)

RELEVANT PROJECTS

Stock Monitor App

Self Learning Project

📅 Aug 2024--Present

- Designed a lightweight cloud application to monitor and predict the stock price of S&P 500 companies using **Python** and Docker. (LINK)
- The Impact - Helps users plot closing prices of stocks, perform correlation analysis and obtain yearly changes of select stocks.

MLOps for Image Segmentation

Freelance Project

📅 Sep 2020

📍 Delft, Netherlands

- Designed an MLOps software solution to regularly train computer vision object detection (Yolov8) and image segmentation models (SAM) using **Python**.
- The Impact - A startup (XOSight BV) uses this software solution to train the computer vision models daily with around 100K+ Images.

Reinforcement Learning Sensitivity Analysis

Academic Project

📅 Sep 2020

📍 Delft, Netherlands

- Implemented Reinforcement learning algorithms - SARSA and Q-Learning on OpenAI Gym environments
- Compared the performance of the algorithms by tuning hyperparameters.

Autonomous Driving using Computer Vision

Group Academic Project

📅 May 2020--June 2020

📍 Delft, Netherlands

- Implemented lightweight neural network models for the autonomous driving of embedded robotic cars.
- Developed the Convolutional Neural Network (CNN) architecture in **Python** and proved its working on a simulator.
- Project Link: (LINK)

EXTRA-CURRICULARS

- Regular half marathon runner (5+ events) (LINK)
- Landscape Photography (LINK)
- Drone Photography (LINK)
- Guitar basics focused on the rhythm guitar (LINK)
- Awarded the Visionary Graduate Engineering Trainee (GET) award at Alstom Transport which recognised my planning and scheduling skills.
- Head of a technical student club during my Bachelors study called the Indian Society for Technical Education (ISTE-NITK).
- During my Bachelor's study, regularly volunteered to help underprivileged students in Indian government schools with their studies.

MANAGERIAL SKILLS

Project Planning

Collaboration

Customer Interaction

Agile Working

Scrum

Mentoring and Training
